## EXPLANATORY NOTES

Most of the tables in this publication have been prepared entirely on a monthly basis to provide easy comparison of data. With a few exceptions, annual and quarterly figures are expressed as Monthly Averages, and these can be converted to actual totals by multiplying by 12 and 3 respectively.

For example (from page 5):

Births in year 1964 -

Monthly average 1,739

Therefore annual total =  $12 \times 1,739 = 20,868$

(Actual figure is 20,866)

Deaths in December Quarter 1964 -

Monthly average 753

Therefore quarterly total =  $3 \times 753 = 2,259$

(Actual figure is 2,259)

The statistics as published can be adapted to give information in a number of different forms. For instance -

- (1) Details can be obtained for calendar or financial years as required by addition of figures for the four relevant quarters.
- (2) Progress total for the year to date can be obtained by adding totals of quarters and months, e.g. -

If May figures are the latest published, total for the 5 months to May =  $3 \times$  monthly average of March quarter + April and May.

This procedure can be used to calculate corresponding figures for the same period of the previous two years or similar information on a financial year basis.

Details of production on pages 12 - 15 are for selected items only. Particulars for several commodities of considerable importance in this State have been withheld because publication would reveal confidential information.

---

## ABBREVIATIONS USED

Throughout this bulletin the following symbols have been used -

- n.a. Not collected, not available for publication, or not applicable.
- .. Nil (or less than 0.5).
- p Preliminary figures.
- r Revised since previous issue.
- Break in continuity of series (where drawn across a column between two consecutive figures).

A blank space in a column of figures means the figure concerned is not yet available.

When the symbol "p" or "r" is placed in the column headed "Period" (as for example on page 17) it refers to all figures on that particular line.

- (a) Post censal estimates of State population, derived by adding to Census population natural increase and recorded net migration, are revised after publication of the next Census results.
- (b) Post censal estimates for the Metropolitan Area are based on the State estimates, distributed principally according to the net increase in the number of dwellings in the various local government areas. These estimates are also revised after publication of Census results.

For meaning of symbol p, see page 3.

(a) Registrations recorded during the period. Changes from quarter to quarter in the number of registrations, particularly of births, do not necessarily reflect changes in the number of occurrences.

(b) Under 1 year of age.

(c) The higher figures for 1961 are partly due to changes in administrative procedures during 1960.

For meaning of symbol r, see page 3.

(a) Dynamo electrical machinery and electrical appliances and equipment.

(b) Metal and semi-manufactures (basic shapes), except wire, but including structural iron and steel.

For meaning of symbol p, see page 3.

## RETAIL SALES

(Series comparable with 1961-62 Retail Census)

The figures below relate to retail sales of goods (as distinct from services, repairs, etc.) from fixed premises at which goods are normally sold by retail to the general public. Goods sold from hotels, garages, and service stations, are included, but those from establishments such as clubs and guesthouses are excluded. Figures for the year 1961-62 are derived from a Census, but other figures are estimates based on sample surveys.
